Coos Bay City Council
Coos Bay
Oregon 97420

Dear Council President and Members:

I'm writing to voice my objections to permitting the LNG export facility in North Bend. My objections are:

- It will damage fishing in the area
- It will very likely pollute the local waters
- This is a potential earthquake/tsunami area; the damage would be exponentially worsened if this facility is in place.
- The thought of all the land owners required to make their land available with no added benefit to our country is shameful.

Please consider my objections and the very real dangers of approving this facility.

Thank you.

Yours sincerely,

Ann C. King
