

CITY OF COOS BAY CITY COUNCIL

Agenda Staff Report

MEETING DATE August 1, 2017	AGENDA ITEM NUMBER 7.
---------------------------------------	---------------------------------

TO: Mayor Benetti and City Councilors

FROM: Jim Hossley, Public Works and Community Development Director

THROUGH: Rodger Craddock, City Manager

ISSUE: Award of Contract for the 6th Avenue Culvert Replacement Project by Public Works & Community Development Director Jim Hossley

SUMMARY:

The culvert crossing under 6th Avenue, located approximately 300 feet south of F Street has been identified as in need of repair. Design has been completed and bids have been advertised and accepted. Due to environmental regulations and utility crossings/conflicts, it was determined that a bridge be constructed to replace the culvert. Two bids were received and accepted: Contractor Bid Amount West Coast Contractors \$646,432 Knife River Materials \$732,970 Engineer's Estimate = \$900,885 This project is funded through the current non-point source agreement with DEQ's State Revolving Fund (SRF) program (otherwise referred to as the Sponsorship Option). The City qualified for up to \$2M of Sponsorship Option projects because of the DEQ loan for the Wastewater Treatment Plant 2 project. Due to the nature of underground work and the potential unknowns it is recommended that a 15% contingency be approved.

ACTION REQUESTED:

If it pleases the Council, award the construction contract to West Coast Contractors for the 6th Avenue Culvert Replacement Project for a total project cost not to exceed \$743,397 (\$646,432 plus a 15% contingency of \$96,965).

BACKGROUND:

An existing wood box culvert located under 6th Avenue, approximately 300 feet south of F Street in Eastside, failed in November 2015. A temporary repair was performed that minimized further damage from occurring to 6th Avenue and potentially prevented damage occurring to the existing utilities. However, it was determined that a permanent solution be designed, permitted and constructed. As a result, on December 15, 2015, Council approved the design contract to Dyer Partnership. Planning and design is complete and bids have been advertised and accepted. The City received a bid from Knife River Materials and West Coast

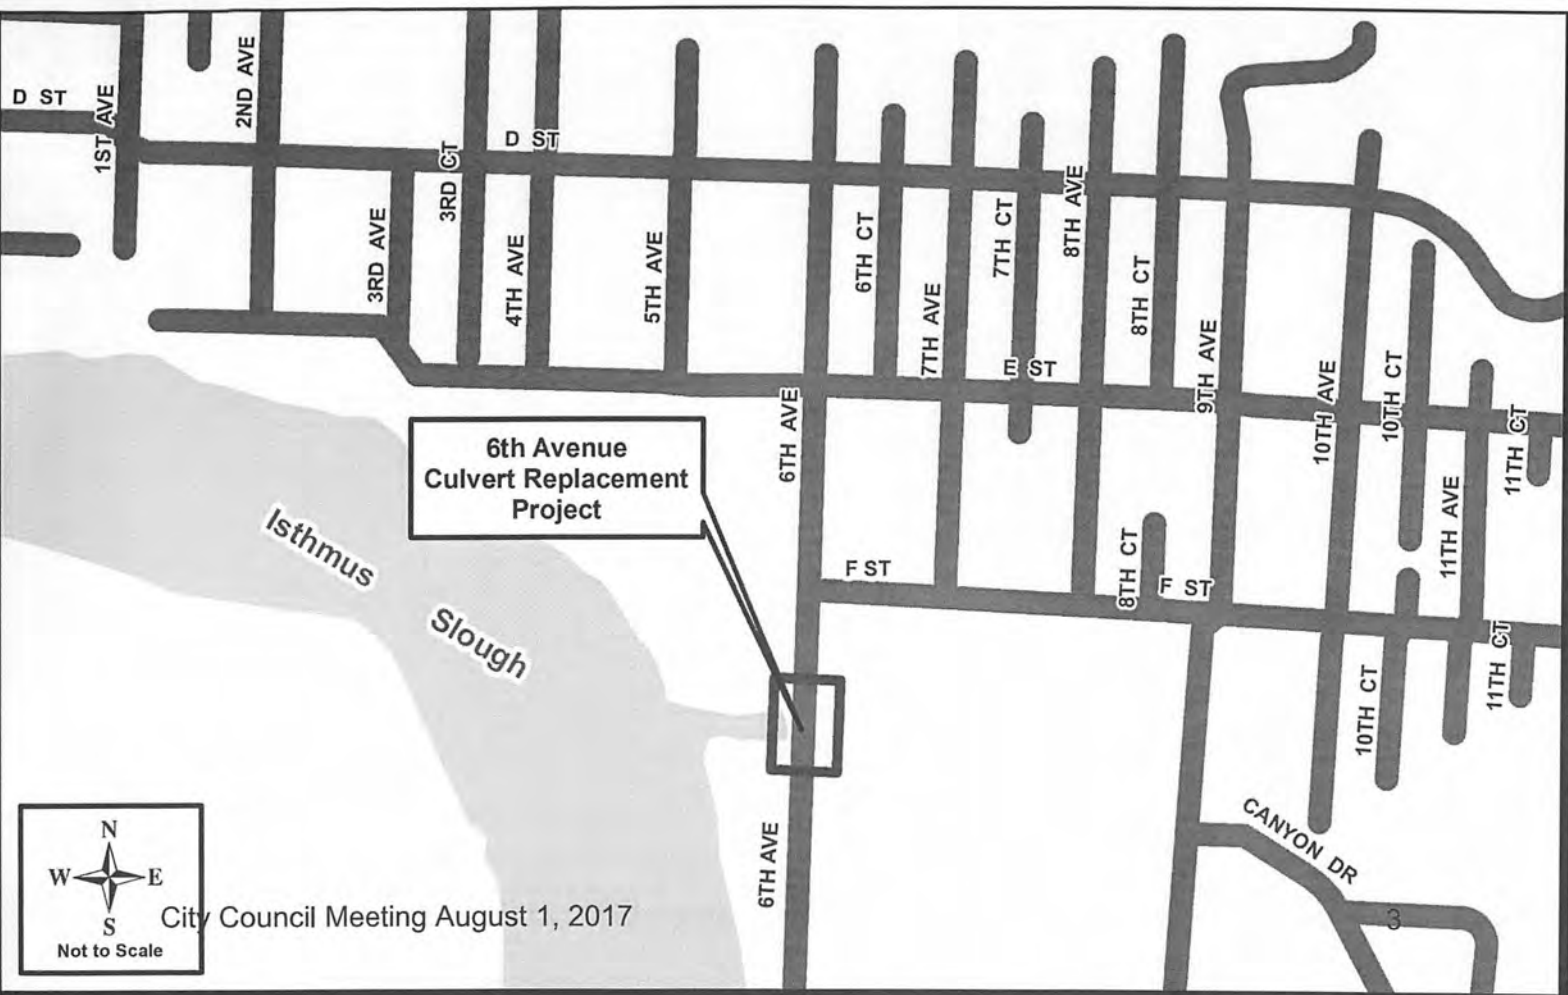

Contractors. The lowest responsive bid was from West Coast Contractors for a bid amount of \$646,432. Staff is recommending a 15% contingency for a total project amount not to exceed without Council approval of \$743,397). If Council approves this recommendation to award the contract, it is anticipated that work will commence towards the end of summer and be finalized no later than February 15 2018, which is the end of the approved environmental in-water work window.

BUDGET IMPLICATIONS:

The City qualified for up to \$2M of Sponsorship Option projects because of the DEQ loan for the Wastewater Treatment Plant 2 project. As a result, this project is funded through the current non-point source agreement with DEQ's State Revolving Fund (SRF) program (otherwise referred to as the Sponsorship Option): Fund 29, Wastewater Improvement Fund, Department 810, Wastewater Plant 2 DEQ SRF Sponsorship Option - #2 Loan (29-810-530-3021).
