**LABOR TRENDS** Over the last twelve months, non-farm employment in Coos County increased by 960 (+4.7%). Manufacturing jobs rose by 160 over the year. Most of that gain occurred in food products in spite of last month’s reduction. Within non-manufacturing, employment expanded in trade (+180) and services (+540). The past-year’s services job growth was greatest in lodging, recreation, and business services, including call center activity. Curry County posted a loss of 20 manufacturing jobs over the year and not much job change in non-manufacturing. Year-over gains in retail trade and government were canceled out by reductions in construction and services. *(Information excerpted from State of Oregon Employment Department)*
